

## BTEC Tech Award in Digital Information Technology

A brief summary of content in the component 3 externally set task:

### A Modern Technology

- A1 Modern Technologies
- A2 Impact of modern technologies

### B Cyber Security

- B1 Threats to data
- B2 Prevention and management of threats to data
- B3 Policy

### C The wider implications of digital systems

- C1 Responsible use
- C2 Legal and ethical

### D Planning and communication in digital systems

- D1 Forms of notation

### How can you help?

Ask students to tell you about their coursework and how it is progressing. Support them in revising for the early exam in February. Get them to explain to you how they will answer each type of question and what the exam command words mean. Use the revision guides to check their understanding of key words and concepts. Encourage them to think about how organisations may use ICT and talk to them about your use of ICT in your work environment and daily life.

### Help with revision:
